

Magisters' Terrace — DPS Playbook

Midnight Season 1 • Patch 12.0.7 • Draft Version 0.9

Dungeon Overview

Interrupt first

1. **Terror Wave** — must stop.
2. **Pyroblast** — must stop.
3. **Polymorph** — high priority.
4. **Shadow Bolt / Arcane Bolt** — use spare interrupts.

Kill first

1. **Lightward Healer**
2. **Blazing Pyromancer**
3. **Void Infuser**
4. **Shadowrift Voidcaller**

Purge and control

- **Arcane Blade** — purge from Sunblade Enforcers.
- **Power Word: Shield** — purge from enemy targets.
- **Hastening Ward** — purge from Seranel immediately.
- Stagger **Brightscale Wurm** and **Unstable Voidling** deaths.

Personal defensive warnings

- Use a defensive for **Ignition**, Runic Glaive or Consuming Shadows.
- Use a defensive when targeted by **Runic Mark** or a long Devouring Entropy.
- Do not combine missed casts with avoidable ground damage.

Arcanotron Custos

Your Job

- Soak **Energy Orbs** before they reach the boss.
- Do not take too many **Unstable Energy** stacks.
- Use damage cooldowns during **Refueling Protocol**; the boss takes extra damage.

Avoid

- Drop puddles around the outside and move out of Arcane Residue.
- Keep clear space behind you before knockbacks.

Defensive

- Use a personal if Shackles overlaps Arcane Expulsion.
- Use a defensive when soaking multiple orbs.

Wipe Mechanic

- An orb reaching the boss damages the group and empowers it.

Quick Reminder

Edge puddles → soak Orbs → burn during Refueling.

Seranel Sunlash

Your Job

- Purge **Hastening Ward** immediately.
- Clear **Runic Mark** inside the Suppression Zone, separately from the other target.
- Enter the zone before **Vow of Silence** finishes.

Avoid

- Spread from other marked players.
- Dodge the arcane impacts produced when marks are removed.

Defensive

- Use a personal when clearing Runic Mark, especially if clearing second.

Wipe Mechanic

- Outside the zone means heavy damage and an eight-second pacify.
- Clearing both marks together stacks group damage.

Quick Reminder

Purge Ward → clear marks separately → enter for Silence.

Gemellus

Your Job

- Cleave all copies because they share health.
- Touch the indicated copy to resolve **Neural Link**.
- Run away from your assigned copy during **Astral Grasp**.

Avoid

- Drop **Cosmic Sting** puddles away from the fighting area.
- Stay outside Cosmic Radiation around every copy.

Defensive

- Use a personal if Cosmic Sting overlaps Astral Grasp.

Wipe Mechanic

- Being pulled into a copy causes extreme damage.
- Failing Neural Link leaves the boss protected.

Quick Reminder

Cleave copies → resolve your link → run from Grasp.

Degentrius

Your Job

- Spread across both sides and cover assigned **Unstable Void Essence** impacts.

- Trigger **Null Bomb** before it expires.
- Keep clear of the tank's Hulking Fragment frontal.

Avoid

- Never cross a **Void Torrent** beam.
- Avoid Entropy Orbs released by Devouring Entropy.

Defensive

- Use a personal for a long Devouring Entropy or a soak overlap.

Wipe Mechanic

- A missed Essence impact damages everyone.
- Crossing a beam stuns and can prevent the next soak.

Quick Reminder

Cover your section → avoid beams and Orbs → trigger Null Bomb.
