

Magisters' Terrace — Healer Playbook

Midnight Season 1 • Patch 12.0.7 • Draft Version 0.9

Dungeon Overview

Dispel first

1. **Ethereal Shackles** — remove the root and damage.
2. **Holy Fire** — remove from the targeted player.
3. **Polymorph** — dispel if the interrupt is missed.
4. **Consuming Void** — dispel before pressure overlaps.

Biggest healing pressure

- **Arcane Volley** — constant group damage from Animated Codices.
- **Ignition** — heavy group damage from Blazing Pyromancers.
- **Runic Glaive** — focused damage on two players.
- **Consuming Shadows** — heavy group damage; line-of-sight can avoid it.
- **Devouring Strike / Void Bomb** — large healing absorbs.

Pull warnings

- Ask the tank to limit **Animated Codices** and overlapping casters.
- Save a cooldown when **Ignition**, Arcane Volley or Consuming Shadows overlap.
- Watch the tank closely against **Devouring Tyrants**.
- Stagger Wurm and Unstable Voidling deaths to reduce burst damage.

Practical tip

- Collect the library's **5% Haste tome**; it lasts 30 minutes and persists through death.

Arcanotron Custos

Your Job

- Dispel **Ethereal Shackles** quickly.
- Top the group before **Arcane Expulsion**.
- Watch players soaking Energy Orbs for **Unstable Energy** stacks.

Avoid

- Stay clear of **Arcane Residue** and keep a safe knockback path.
- Do not soak several Energy Orbs back-to-back without a defensive.

Cooldowns

- Use a healing cooldown if Shackles overlaps Arcane Expulsion.
- Prepare extra healing during **Refueling Protocol** orb soaks.

Wipe Mechanic

- An Energy Orb reaching the boss damages the group and empowers it.
- Poor puddle placement can remove all safe space.

Quick Reminder

Dispel Shackles → top before Expulsion → watch orb stacks.

Seranel Sunlash

Your Job

- Spot-heal players targeted by **Runic Mark**.
- Stagger mark removals so group damage does not stack.
- Enter the Suppression Zone before **Vow of Silence** finishes.

Avoid

- Do not overlap with another marked player.
- Move away from the arcane impacts produced when a mark is removed.

Cooldowns

- Use externals or focused healing on the second mark target.
- Prepare a cooldown if **Hastening Ward** is not purged.

Wipe Mechanic

- Outside the zone means heavy damage and an eight-second pacify.
- Removing both marks together can overwhelm the group.

Quick Reminder

Heal marks → stagger removals → enter the zone for Silence.

Gemellus

Your Job

- Watch **Cosmic Sting** targets and its damage-over-time effect.
- Keep escape lanes clear when **Void Secretions** create puddles.
- Help players struggling against **Astral Grasp**.

Avoid

- Run away from your assigned copy during Astral Grasp.
- Stay out of **Cosmic Radiation** around each copy.

Cooldowns

- Use spot healing on low-mobility players during Astral Grasp.
- Use a defensive if Cosmic Sting overlaps the pull.

Wipe Mechanic

- Being pulled into a copy causes extreme damage.
- Failing **Neural Link** protects the boss and prolongs the fight.

Quick Reminder

Heal Sting → keep escape lanes clear → run from the pull.

Degentrius

Your Job

- Dispel the tank's **Umbral Splinters** only after they leave melee.
- Heal **Devouring Entropy** targets and watch for soak overlaps.
- Help cover an assigned **Unstable Void Essence** impact.

Avoid

- Never cross a **Void Torrent** beam.
- Avoid Entropy Orbs released when Devouring Entropy ends.

Cooldowns

- Plan major healing for Devouring Entropy plus Essence soaks.
- Use an external if the tank must hold Hulking Fragment damage during an overlap.

Wipe Mechanic

- Missing an Essence impact damages the entire group.
- **Null Bomb** must be triggered before it expires.

Quick Reminder

Move tank out → dispel Splinters → heal Entropy and soaks.
