

ALTAR OF FANGS DPS QUICK SHEET

Midnight Season 2 • Patch 12.1 • Version 0.5 Pre-Season PTR Draft

PRIORITY TRASH CALLS

- High Evolutionist — Evolve:** Must interrupt.
- Ravenous Descendant — attack-speed stacks:** Focus or control before the damage ramp.
- Caustic Mist Totem — Destroy:** Complete the interaction.

RAV’I

- DO:** Break shield fast and catch your meat.
- WIPE:** Uncaught meat damages everyone; a slow shield break strengthens the roar.

ZUL’JAN

- DO:** Soak → clear → reposition.
- WIPE:** Repeated soaking without clearing creates lethal venom stacks.

THE WRITHING COIL

- DO:** Movement ready. Run immediately.
- WIPE:** One late player can prevent enough distance being created.

DPS SURVIVAL

- Stop Evolve and Toxic Atrophy.
- Priority mechanics before uptime.
- Personal for roar, venom and movement overlaps.

RUN FLOW: Opening → Rav’i → Mutation Chambers → The Writhing Coil → Altar Ascent → Zul’jan

DPS = DPS cues • RED = Wipe Check • Read in dungeon order

ALTAR OF FANGS — DPS PLAYBOOK

Midnight Season 2 • Patch 12.1 • Version 0.5 Pre-Season PTR Draft

Dungeon Overview

Interrupt first: High Evolutionist — Evolve; The Writhing Coil — Toxic Atrophy.

Kill first: Rav'i feeding shield; fixating snakes; dangerous casters.

Movement warning: Vine Grip distance is worth more than boss uptime.

Practical tip: Assign beams on Zul'jan before the pull.

Opening Trash — Before Rav'i

Ravenous Descendant — attack-speed stacks: Focus or control before the damage ramp becomes dangerous.

Caustic Mist Totem — Destroy: Complete the interaction; damage no longer interrupts it on PTR.

Rav'i

Your Job: Break the feeding shield immediately. Catch assigned meat. Spread for Triple Shot.

Interrupt / Priority: Feeding shield first; catching meat is worth more than boss uptime.

Avoid: Regurgitate waves; Triple Shot overlaps; multiple meat impacts.

Defensive: Use a personal during feeding or a high-stack Fetid Roar.

Wipe Mechanic: Uncaught meat damages everyone; a slow shield break strengthens the roar.

Quick Reminder: Break shield fast and catch your meat.

Relevant Trash — Between Rav'i and The Writhing Coil

High Evolutionist — Evolve: Must interrupt.

Ascendant Serpent — live verification required: Use spare stops only after Evolve is covered.

DPS PLAYBOOK — CONTINUED

Altar of Fangs • Full guide continued • Version 0.5 Pre-Season PTR Draft

The Writhing Coil

Your Job: Stop Toxic Atrophy, move directly away with Vine Grip and focus fixating snakes.

Interrupt / Priority: The Writhing Coil — Toxic Atrophy; fixating snakes during Uncoil.

Avoid: Burrowing Charge; Venom Jet; Undermining; tank-facing side in melee.

Defensive: Use a personal for delayed Death Rattle or Synchronized Venom.

Wipe Mechanic: One late player can prevent enough distance being created.

Quick Reminder: Movement ready. Run immediately.

Relevant Trash — Between The Writhing Coil and Zul'jan

High Evolutionist — Evolve: Cover the interrupt if present.

Altar ascent pack — live verification required: Confirm final kick, stop and kill order on live.

Zul'jan

Your Job: Soak your assigned beam, track Ritual Venom and clear it with a physical mechanic.

Interrupt / Priority: Beam assignment and venom clearing first; ranged keep beam lanes open; melee avoid the front.

Avoid: Axegrinder; Boneslicer unless clearing; blood pools; the boss's front.

Defensive: Use a personal while soaking or deliberately clearing venom.

Wipe Mechanic: Repeated soaking without clearing creates lethal venom stacks.

Quick Reminder: Soak → clear → reposition.

Verification Note

PRE-SEASON: Verified: Blizzard PTR notes; Wowhead PTR Dungeon Journal; Warcraft Wiki; MMO-Champion PTR update; experienced PTR testing. Trash casts and route require live verification.
